

**Project Title:** Affordable Climate-resilient Water Supply Infrastructure Prototype for Indian Himalayan Region.

#### **Project Activity:**

An awareness and community mobilization activity was conducted on 22 Jan 2026 in Umrela village, Duggada block, Pauri Garhwal district, under the NMHS Project.

The activity included a visit by the Village Water and Sanitation Committee (VWSC) and five FTK women to the water source, storage tank, and around village.

Water quality testing was demonstrated at the source and in the village, with the FTK women performing the tests. The NMHS project team circulated IEC materials and shared knowledge on the importance of water quality, the risks of contaminated water, and waterborne diseases.

The team also discussed upcoming activities planned under the project.
